

Creating Student Accounts – Wikispaces

(no email addresses required)

1. Create a text file with comma-separated usernames and passwords:

NOTE: Choose something that may not already be taken. (Use a student ID and password scheme that already exists at your school.)

Example:

clarkwiki1,temp123

clarkwiki2,temp123

2. Go to MANAGE WIKI > USER CREATOR
3. Follow directions to create student logins. (You will copy and paste the names and passwords from the text file.)
4. Have students practice logging in and editing a page. (Create a practice page before students login to use strictly as practice. Delete later.)
